

EXOTANIUM

ABOUT US

Exotanium, Inc. is developing new cloud-native application containers that are secure and fast. Containers are revolutionizing development and operations (DevOps) for businesses in the cloud where both security and performance are paramount. Exotanium X-Containers support business needs with strong security, high performance, customizability, and low cost. Exotanium X-Containers also prevent vendor lock-in with portable, hybrid, and multi-cloud orchestration. See our pitch at the [Cornell Entrepreneurship Summit 2018](#).

WHAT IS NEW

- We are excited about receiving an [NSF SBIR Phase-I award](#)! This is funding that focuses on high-impact technologies. [Click here to learn more about NSF SBIR](#).
 - Our technical paper on X-Containers will appear in the 24th ACM International Conference on Architectural Support for Programming Languages and Operating Systems ([ASPLOS'2019](#)).
 - We made significant progress on integrating X-Containers and the [runV runtime](#), which gives us [OCI](#) compatibility and seamless access from Docker and Kubernetes.
-

OBSTACLES ENCOUNTERED

Due to the government shutdown, our SBIR funding was delayed for more than one month! We are not able to start hiring until Feb. 22nd.

PLEASE HELP

We would like to talk to customers! If you happen to know anybody who uses containers, please introduce them to us. We are eager to learn more about their experiences.
